PRODUCT

Granular insecticide against flies.
[Registration of Italian Ministry of Health No. 19749](#)

COMPOSITION

Imidacloprid	0,500 %
Denatonium Benzoate	0,010 %
Inert ingredients	99,49 %

ACTIVITY & CHARACTERISTICS

MOSKITA is a specific granular bait for the fight against flies. It is based on Imidacloprid, an active ingredient belonging to the group of neonicotinoids, which acts rapidly both by contact and ingestion. The baits contains sexual attractants (Z9-tricosene) and food attractant, guaranteeing a strong action against flies, enabling quick, efficient control.

Contains Denatonium benzoate, a bittering agent that reduces the risk of accidental ingestion by children and non-target animals.

MOSKITA is recommended for indoor and outdoor treatments in rural, zoo-technical (milking halls, stalls, animal shelters, farms and manure heaps), civil (schools, hospitals, cinemas, shops, barracks, hotels, restaurants and canteens) and industrial (such as food industries) environments.

METHODS AND DOSAGES FOR USE

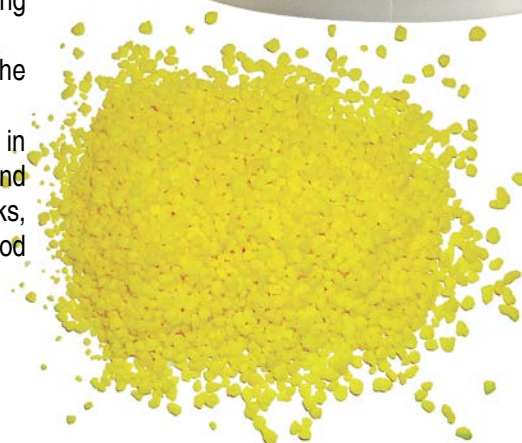

Use as bait.

Position the bait where flies are seen (e.g. corners, window sills, top parts of walls, angles, waste separation barriers, etc.), directly on flat surfaces or unreachable supports on dishes or in specific stations. 20 grams of granules are sufficient to treat a region of around 10 m². Position Moskita in places that are inaccessible to animals.

Dampen the product slightly with water or milk for greater action; it remains effective for 3-6 weeks from positioning.

Use as paint for zoo-technical use only.

We recommend placing 100 g product in 75 ml warm water or milk. Shake well to dissolve the granules completely and apply the mix obtained 15 minutes later. The product is not spread directly on the walls but only on specific removable

cardboard, wood or plastic panels. Use 100 grams of product as a paint to treat 50 m². Position the bait out of the reach of animals. Only treat before introducing the panel into the premises.

WARNINGS

Store in a place that is inaccessible to pets. Do not contaminate food, drink or recipients used to store food and drink whilst using. In the event of contamination, wash thoroughly with soap and water. Do not use in agriculture.

HAZARD STATEMENTS

H411 Toxic to aquatic life with long-lasting effects.

EUH208: Contains Z9-tricosene. May produce an allergic reaction.

PRECAUTIONARY STATEMENTS

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P103 Read label before use.

P273 Avoid release to the environment.

P391 Collect spillage.

P501 Dispose of contents/container in accordance with regulation.
