

## DRAKER 10.2

*Microencapsulated insecticide concentrate.*

### MANUFACTURING COMPANY:

Vebi Istituto Biochimico srl  
Via Desman, 43 - 35010 Borgoricco (PD) Italy  
Tel. (+39) 49 9337111 - Fax (+39) 049 5798263  
www.vebi.it

### PRODUCT

Draker 10.2 is multi-target microencapsulated liquid insecticides.  
[Registration of Italian Ministry of Health No.19380](#)

### COMPOSITION

Cypermethrin	10 %
Tetramethrin	2 %
Piperonyl Butoxide	10 %
Emulsifiers and solvent	78 %

### ACTIVITY & CHARACTERISTICS

**Draker 10.2** is a long-lasting, broad-spectrum water-based concentrated microencapsulated insecticide. The formula contains Tetramethrin, which produces a very effective killing action, and Cypermethrin, which is responsible for the residual effect, further boosted by the microencapsulation. The microcapsules actually have the effect of protecting the active ingredients and releasing them slowly.

**Draker 10.2** kills insects that are present at the time of treatment and prevents future infestations from developing for at least 2-3 weeks. The product is effective against most irritating or harmful insects found in commercial, domestic or industrial environments (cockroaches, scorpions, ants, fleas, spiders, bugs, ticks, silverfish, insects infesting warehouses and storerooms, occasional invaders, as well as mites). It is also effective against flying insects like flies, horseflies, mosquitoes, midges and wasps that are exposed to the treated surfaces, such as walls, floors, shutters, curtains, upholstery, etc.

### METHODS AND DOSAGES FOR USE

**Indoors:** Apply the insecticide solution using normal spray pumps, paying particular attention to the areas around the rooms' perimeter, skirting boards, corners and cracks, the back of furniture, kitchens, ovens, fridges, anywhere waste is kept, toilets and wherever insects are likely to be nesting or pass through. For flying insects, treat surfaces where they tend to set down. If treating a farm, remove animals before treatment and vent the enclosures well before allowing the animals going inside again.

**Outdoors:** Apply on walls, windows, windowsills, eaves, hedges and anywhere waste is kept.

In order to prevent and discourage re-infestation of the interior, we recommend spraying about 1 metre up the perimeter walls of the buildings and, at the same time, spraying a 1-metre-wide strip of ground all around the buildings.

To treat non-absorbent surfaces, use 5 to 10 ml of product per litre of water depending on the degree of infestation. Treat absorbent surfaces (such as rough walls) with 10 to 20 ml per litre of water. For flies and cockroaches, use 10 to 30 ml per litre of water.

## WARNINGS

Do not spray product into the air: spray on surfaces only. Do not contaminate food, drink or their containers during use. Avoid breathing spray and wash your hands if they have insecticide liquid on them. Do not use in concentrated form: follow the manufacturer indications.

## HAZARD STATEMENTS

H410 Very toxic to aquatic life with long lasting effects.

## PRECAUTIONARY STATEMENTS

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P103 Read label before use.

P273 Avoid release to the environment.

P391 Collect spillage.

P501 Dispose of contents in accordance with local regulation.
