PRODUCT

Draker RTU is a multi-target microencapsulated insecticide.
[Registration of Italian Ministry of Health No.19375](#)

COMPOSITION

Cypermethrin	0,30 %
Tetramethrin	0,06 %
Piperonyl Butoxide	0,30 %
Formulates in sufficient quantity for	100 %

ACTIVITY & CHARACTERISTICS

Draker RTU is a long-lasting, broad-spectrum water-based ready to use microencapsulated insecticide. The formula contains Tetramethrin, which produces a very effective killing action, and Cypermethrin, which is responsible for the residual effect, further boosted by the microencapsulation.

The microcapsules actually have the effect of protecting the active ingredients and releasing them slowly.

Draker RTU kills insects that are present at the time of treatment and prevents future infestations from developing for at least 2-3 weeks. The product is effective against most irritating or harmful insects found in commercial, domestic or industrial environments (cockroaches, ants, fleas, spiders, bugs, ticks, insects infesting warehouses and storerooms, occasional invaders, as well as mites). It is also effective against flying insects like flies, horseflies, mosquitoes, midges and wasps that are exposed to the treated surfaces, such as walls, floors, shutters, curtains, upholstery, etc.

METHODS AND DOSAGES FOR USE

Apply uniformly the product on the area of presence and on the runways of the insects, especially rooms' perimeter, skirting boards, corners and cracks, the back of furniture, kitchens, ovens, fridges, anywhere waste is kept, toilets and wherever insects are likely to be nesting or pass through. For flying insects, treat surfaces where they tend to set down. Against ant, apply **Draker RTU** along the passageway: windowsill, doorstep, jamb, terrace, cornice. Against mosquitoes, treat hedges, fields and green areas where usually there are people. Usually 500 ml are sufficient to treat a surface of 20-30 m².

WARNINGS

Do not spray product into the air: spray on surfaces only. Do not contaminate food, drink or their containers during use. Avoid breathing spray and wash your hands if they have insecticide liquid on them. Temperatures lower than 0°C can cause the solidification of the product.

HAZARD STATEMENTS

H410 Very toxic to aquatic life with long lasting effects.

PRECAUTIONARY STATEMENTS

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P103 Read label before use.

P273 Avoid release to the environment.

P391 Collect spillage.

P501 Dispose of contents in accordance with local regulation.
