PRODUCT

Ecological fly-capturing trap.

COMPOSITION

Food origin formulation without poison.

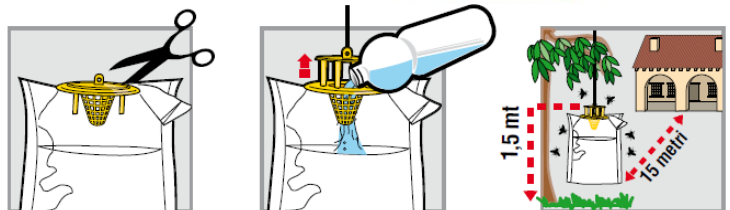

ACTIVITY & CHARACTERISTICS

- Disposable plastic trap.
- Captures up to 40,000 flies without using poison.
- Easy to apply.

METHODS AND DOSAGES FOR USE

1. Free the upper lid, cutting the casing along the dotted line.
2. Lift the lid to open.
3. Add warm water up to the level shown.
4. Hang the trap approximately 1.5 metres from the ground.
5. Use the trap in the open air, at least 15 metres away from buildings.
6. Position in the places where flies develop and where their presence is most seen.
7. Place the trap in an area exposed to the sun (or in the shade if the temperature exceeds 28°C).
8. Avoid windy and closed, unventilated areas.
9. The trap will start to work after a few hours.
10. Add water if it should dry out.
11. When the trap is full, close the lid and dispose of as waste.

As flies are carriers of pathogens, the trap must be kept away from children and pets. In the event of accidental contact with the content, seek medical advice.
